

# Pears

There are over 3000 varieties of Pears worldwide! The US is the largest producer of Pears in the world, with the majority grown on the west coast, mainly Oregon and Washington. Although Pears mature on the tree, they ripen best off the tree. Every United States Pear is picked by hand. Pears used to be called "butter fruit" for their soft, butter-like texture. Pears are also a part of the rose family!

Pears also provide essential vitamins and minerals, including vitamin C, vitamin K and Potassium.

Pears come in many different varieties. Bartlett, Bosc, and D'Anjou pears are among the most popular!
